Report for the public talk of ESR Georgia Tseliou – UOC 1

The public talk of the ESR was given in the First UOC International Symposium organized by the Open University of Catalonia (UOC) (http://congress.uoc.edu/rdi2013/), on December 18, 2013, Barcelona, Spain. The subject of the flash presentation was: “Network Virtualization in 5G Cellular Networks”. The program of the flash presentations can be found in the following link: https://congress.uoc.edu/rdi2013/base/event/index/id/355. Additional to the talk, a poster with same topic was presented.

The ESR presented a general overview on Network Virtualization for LTE-A environments and the parts of the architecture where her work focuses on in the context of the CROSSFIRE project. After the flash presentation the ESR had the opportunity to present a poster with the background, objectives, methods and results of her research activity.

Attached in this folder the abstract of the presented work, the poster and the flash presentation can be found. Both the abstract and poster can be found in the webpage of the event as well: https://congress.uoc.edu/rdi2013/base/page/index/id/31.

Additionally, the following links and pictures present snapshots of the event:
